PROFILE

Full-stack engineer and competitive programmer building production systems across AI, web, and systems domains. Strong foundation in DSA (top 8% among 250,000+ at AlgoUniversity ATF), backend architecture, and LLM integration. Proficient in Python, Java, C/C++, Next.js, Flask/FastAPI, and Supabase; with a bias for shipping things that actually work.

EDUCATION

SRM Institute of Science & Technology

B.Tech Computer Science & Engineering (Core) · Chennai

2024 – 2028

CGPA 9.24

ST Clare's High School

Class XII · CBSE · PCM · Agra

2024

89.8%

St. Paul's Church College

Class X · ICSE · Agra

2022

89.2%

PROJECTS

Here! — AI Face Recognition Attendance System

PRODUCTION

Python · Flask · RetinaFace · Facenet512 · Next.js · TypeScript · Supabase · Cloudflare Tunnel

- Engineered an end-to-end attendance system using RetinaFace for detection and Facenet512 for recognition, processing 40+ students per scan in seconds.
- Deployed hybrid architecture: Next.js frontend on Vercel, local Python backend bridged via Cloudflare Tunnel to bypass public IP constraints.
- Integrated Supabase for attendance records with real-time query support.

The Woven Guild — Client Production Website

LIVE · CLIENT

Next.js · JavaScript · SQL · Resend API · Vercel

- Sole developer for a client-owned creative brand; translated business requirements into a fully deployed production site with live users.
- Implemented complete frontend and backend including transactional email, database integration, and performance optimization.

DASHR — Hyperlocal Delivery Platform

FULL-STACK

Next.js 14 · TypeScript · Supabase · Tailwind CSS

- Built a student-run delivery platform for SRM IST hostels with a tiered commission model, hybrid UPI/cash payments, and agent-bidding for off-campus orders.
- Designed a neobrutalist dark UI with full order management, real-time status tracking, and role-based access for agents and customers.

MusAIc — AI Music Recommender

AI/ML

FastAPI · HuggingFace GPT-2 · OpenCV · Spotify API · Tkinter

- Multimodal mood detection pipeline combining facial expression recognition (OpenCV) and text sentiment analysis (GPT-2) to drive real-time Spotify song recommendations.

BurstTime Chronicles — CPU Scheduling Simulator

SYSTEMS

Python · Tkinter · NumPy

- Interactive visualizer for FCFS, SJF, and Round Robin scheduling algorithms with real-time Gantt chart rendering and process metrics.

SKILLS

LANGUAGES	Python, Java, C, C++, TypeScript
FRONTEND	Next.js 14, React, HTML/CSS, Tailwind CSS
BACKEND	Flask, FastAPI, Node.js, REST APIs
DATABASES	Supabase, MySQL, SQLite
AI / ML	HuggingFace, OpenCV, Groq API, LLM integration
INFRA	Git, Vercel, Railway, Cloudflare Tunnel, Linux
CS CORE	DSA, OOP, DBMS, OS concepts
COMP. PROG.	LeetCode , Codeforces , HackerRank

COMPETITIONS & ACHIEVEMENTS

AlgoUniversity ATF — Stage 2 Qualifier	OCT 2025
Ranked top 8% nationwide among 250,000+ participants across Stage 1; advanced to Stage 2.	
Hack Summit — Open Innovation Hackathon	SEP 2025
Built backend and AI logic for a platform converting real-world problems into hackathon-ready statements using FastAPI, MySQL, and LLM-based NLP.	
1st Place, Beatboxing — SHURU '25 (SRM IST)	JAN 2025

CERTIFICATIONS

Programming in Java	OCT 2025
NPTEL · OOP, exception handling, collections, multithreading, file I/O	
Zero to Hero in Cybersecurity & Ethical Hacking	JAN 2026
Udemy · attack vectors, network security, ethical hacking fundamentals
